

MIDHUN KATTA

SOFTWARE ENGINEER INTERN | FULL-STACK&AI DEVELOPER

midhunkatta17@gmail.com · <https://github.com/midhunkatta17-art> · <https://www.linkedin.com/in/midhun-katta-023666337>

PROFILE

B.Tech Information Technology student (2024–2028) with hands-on experience in software development, AI applications and data analytics.
Strong foundation in Data Structures&Algorithms, Object-Oriented Programming, DBMS, Operating Systems and Computer Networks.
Proficient in Java, Python, C, SQL, React.js and REST APIs, with practical experience using Git/GitHub. Strong analytical and problem-solving mindset with the ability to learn new technologies quickly.

EDUCATION

Seshadri Rao Gudlavalleru Engineering College 2024 – 2028
B.Tech – Information Technology
Coursework: Data Structures & Algorithms · OOP · DBMS · Operating Systems · Computer Networks

TECHNICAL SKILLS

Programming Java · Python · C	Web Development HTML5 · CSS3 · React.js · Node.js · Express.js · REST APIs
CS Fundamentals DSA · Algorithms · OOP · DBMS · OS · Computer Networks · Complexity Analysis	Databases&Tools SQL · MySQL · MongoDB · Git · GitHub · VS Code · Vercel

EXPERIENCE

- CodeAlpha – Python Development Tasks**
- Completed Python development tasks including **Stocker** and **Hangman Game** applications.
 - Applied Python programming, logical thinking and problem-solving skills to build functional applications.
 - Strengthened debugging and application development skills through hands-on Python projects.
- SmartBridge – Full Stack Developer (MERN Stack)**
- Developed a **Customer Registry** application using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
 - Implemented frontend and backend functionality with database integration for managing customer information.
 - Gained hands-on experience in REST APIs, CRUD operations, application development and debugging.
- SmartBridge – AWS Cloud Computing**
- Gained practical exposure to **AWS cloud computing** concepts and cloud-based application deployment.
 - Worked with AWS services and learned fundamentals of cloud infrastructure, storage and compute resources.
 - Applied cloud computing concepts through hands-on tasks and project-based learning.

PROJECTS

- Full Stack Developer – Customer Registry Project**
- Developed a full-stack Customer Registry application with frontend, backend and database integration.
 - Implemented customer data management features including registration, storage and retrieval.
 - Worked with APIs, database connectivity and application debugging to build a functional web application.
- Python Developer – CodeAlpha Projects**
- Completed Python-based development tasks, including a **Stocker application** and **Hangman Game**.
 - Applied Python programming, object-oriented concepts and problem-solving to build functional applications.
 - Improved debugging and logical programming skills through hands-on development tasks.
- AWS Cloud Computing – Stocker Project**
- Developed and deployed a **Stocker** application using AWS cloud services.
 - Gained practical exposure to cloud computing, AWS infrastructure and application deployment.
 - Worked with AWS services and troubleshooting processes to support application availability and functionality.

CERTIFICATIONS

- Full stack and mern developer – SmartBridge
- AWS Cloud computing– SmartBridge

CORE STRENGTHS

Analytical Problem Solving · Quick Learning · Self-Motivation · Adaptability · Technical Communication · Software Development
